VACUUM SYSTEMS FOR ECG- & ERGOMETER WORKSTATION*

Medizintechnik GmbH

FLEXIBLE

STRÄSSLE & CO is one of the world's leading manufacturers of ECG vacuum systems. Our devices are used in hospitals, clinics and medical practices throughout the world to complement ECG and ergometer workstations. Vacuum systems supplied by STRÄSSLE & CO are renowned for their wide range of functionality and reliability, for their intuitive ease of use, their well-engineered control technology and their superior efficiency.

With the product families DT100 and DT80 in their various equipment combinations, as well as the EASY and DT Basic systems, we offer solutions for every application.

All STRÄSSLE vacuum systems feature proven control technology in four freely selectable vacuum levels. With blow-out function, before and after each application.

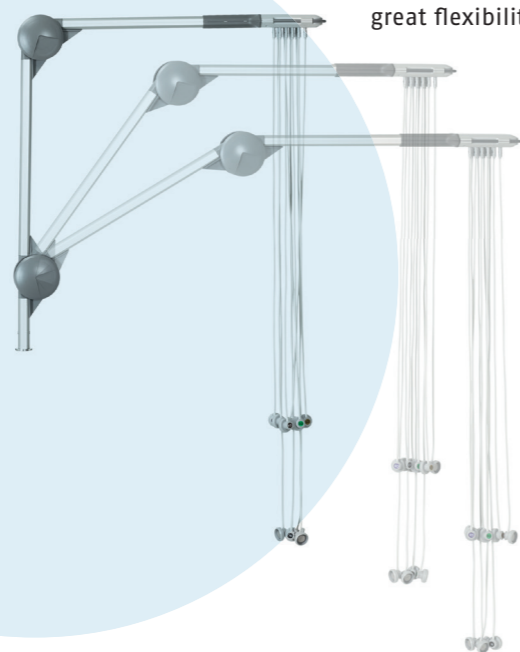

Customers who are familiar with our solutions are no longer prepared to sacrifice comfort and performance. The vacuum systems produce optimum transfer quality thanks to the special automatic vacuum control. As a result, the suction cups adhere optimally to the skin surface – automatically and instantly, saving time for the user and maximising on-the-job efficiency.

SUPPORT ARM B

- ⊕ Variable positioning due to special design of the joints.
- ⊕ Automatic holding of the desired arm position, without additional manual fixation or locking.
- ⊕ Integrated rotation damping and over-rotation protection for horizontal swiveling up to 315° and long reach up to approx. 130 cm.

All this enables uncomplicated and thus fast, effective handling with great flexibility.

DT80 VACUUM UNIT

Small vacuum unit, designed for occasional use in the doctor's office.

DT100 VACUUM UNIT

Large vacuum unit, with large-volume vacuum pump, designed for the highest demands in cardiology and clinics. Also available in battery version for mobile use in daily clinical routine.

EVERYWHERE

ACCESSORIES AND MOUNTING KITS

Various perfectly thought-out accessories facilitate and perfect the application in everyday work. And with our well-designed and versatile mounting kits, the devices can be attached wherever they are needed. Simple, intelligent and individual.

MOBILE SYSTEM VERSIONS

STRÄSSLE suction systems are also available as mobile systems. Either with rolling stand as „PLUS version“ or combinable with various equipment trolleys. This means flexible application through variable placement.
